

Do you need portable refrigeration?

Refrigerated Containers

Supplied within 24 hours

3.5m/6m/12m equipment available

- A Refrigerated (Reefer) Container can be used for products requiring either frozen or cool room conditions.
- In the frozen mode it can be used for storage of products such as seafood, meat, poultry, ice cream and ice.
- In a low temperature cool room condition (like your standard refrigerator) it can be used for the storage of products like beer/wine, fruit/vegetables, food platters etc for parties and large-scale functions.
- Temperatures can be preset from **-20°C to +12°C** using the digital temperature panel.

Features include

- All steel construction to enable stacking.
- Aluminium exterior walls.
- Stainless steel interior panels.
- Rust resistant paint on exterior for longer life.
- Double locking system to prevent theft.
- Safety doors and lights.
- Single phase or 3 phase configured power.
- Forklift pockets for easy handling and corner castings.
- Fully weatherproof.

Popular accessories

- Lock cover and padlock to ensure greater security in remote storage locations.
